SUMMARY

IT student (expected 2026) specializing in Artificial Intelligence with hands-on experience in machine learning, computer vision, and real-world AI projects. Experienced in integrating AI with IoT and embedded systems to develop smart, data-driven solutions. Passionate about building intelligent technologies and continuously improving problem-solving and technical skills.

EXPERIENCE

Circuits Trainer – 966 Innovation Hub

03/2026 – Present

- Trained students in electronics, circuits, and fundamental engineering concepts
- Conducted hands-on sessions focused on problem-solving and practical system design

AI Trainer – Ai Arena

02/2025 – 03/2026

- Delivered training in artificial intelligence, robotics, and intelligent systems
- Guided students in programming and developing data-driven solutions

PROJECTS

Makani – AI-Powered Real Estate Search Engine

02/2026 – 04/2026

- Developed an intelligent search platform using NLP and LLMs to process real estate queries.
- Built a machine learning pipeline for query understanding, information extraction, and ranked search results

Live Demo: <https://saudi-real-estate-makani.vercel.app> 📄

WildArabia – AI-Based Wildlife Identification System

12/2025 – 02/2026

- Developed an AI-powered system using computer vision to identify and classify wildlife species
- Built a data-driven solution for analyzing environmental data and providing accurate species recognition

Tabayyun – AI-Driven Anomaly Detection System

12/2025 – 01/2026

- Developed an AI-based system to detect abnormal patterns in financial transactions using machine learning
- Built a data-driven approach for early anomaly detection and intelligent analysis of transaction behavior

SEEN – Smart Emergency Wearable System (Graduation Project)

06/2026 – Present

- Developed a complete emergency response system including a wearable device and cross-platform mobile applications (iOS & Android)
- Built a cloud-connected solution enabling real-time monitoring and instant alert notifications for enhanced user safety

EDUCATION

Bachelor of Information Technology (Second-Class Honors)

Imam Mohammad Ibn Saud Islamic University

06/2022 –
Expected 2026

SKILLS

Artificial Intelligence & Machine Learning

Machine Learning, NLP, Computer Vision, PyTorch

Programming

Python, JavaScript, C++, Java, Dart

Backend & Web Development

Backend: FastAPI, Flask, SQL, Frontend: React, HTML, CSS

CERTIFICATES

AI & Computer Vision Training
Misk Skills

Advanced Artificial Intelligence
Course
KAUST

Building LLMs from Scratch
SDAIA

Mechatronics Bootcamp
Tuwaiq Academy

UI/UX Training
Tuwaiq Academy

Developing Generative AI
Solutions
SDAIA

LANGUAGES

Arabic

English
